Summary

Backend developer with 3+ years of experience building real-world products and internal tools across multiple domains.

Currently pursuing a B.Sc. in Computer Science at the Technion (GPA 91, Dean's List).

Driven by curiosity, a focus on problem-solving, and a commitment to building practical, reliable software.

Work Experience

Backend Developer, Unit 81

June 2020 - January 2024

- Designed and developed multiple microservices using Python (Django, REST) to support core business operations.
- Collaborated with both technical and non-technical clients to define requirements and deliver effective solutions.
- Researched, evaluated, and implemented new technologies to enhance performance and developer productivity.

Projects

PDF Bookmark Manager

November 2024 - Present

- Developed a Chrome extension to streamline PDF reading and bookmarking workflows. Available on the [Chrome Web Store](#).
- Built and deployed a companion landing page, managing domain, and payment integration.
- Attracted 40+ regular users through organic reach and community engagement

Data Structures Projects (C++)

2025

- Designed and implemented core data structures including AVL trees, union-find sets, and hash maps in C++.

Digital Whisper Article - "איך לחשוב עם הקופסה"

2021

Co-authored an article explaining design patterns, [link](#)
